Silage Fodder

(Experimental Farm Notes)

The farmers in the semiarid districts of the prairies know the importance of carrying over from a good crop year some extra feed in case of a lean year. There is no difficulty in keeping grain indefinitely in well constructed bins, but not always they are not so easily kept without considerable waste.

Two medium sized trench silos, a farm would go a long way toward solving the roughage problem. One silo could be kept full while feed was plentiful using the oldest silage first each winter and the second silo would always be available in case of a poor crop year.

If the silo is located in a well drained lot or ditched around the edge to prevent surface water from entering the silage will keep indefinitely and affords the succulence so valuable in the feeding of milch cows during the winter and sheep at lambing time.

The trench silo is not out of reach of the average farmer. It has been called the costless silo as it is free for the digging which only requires a short time with a plow and scraper.

The silage is more readily packed if put through an ensilage cutter but several farmers have reported success by cutting the stalks with a horse and tramping the stalks with a horse.

Silage can be made from most any green material such as sunflowers, corn, oat sheaves, frosted grain, dry corn fodder, weeds or a mixture of all.

If any dry material is ensiled it requires a good quantity of green material with it or a small stream of water run into the lower while cutting. In dairy farming sections silos are often filled several times during the year with various low grade feeds and after standing for 3 or 4 months the silage is ready for use.

At the Scott Experimental Farm sunflowers have proven to be the most satisfactory silage crop to grow. The chief point in their favor is that a much greater tonnage per acre can be produced than from any other crop tested. In addition to this they are more frost hardy than corn. The three acres of frost registered at Scott on August 31st killed most of

the leaves on the corn but sunflowers in the same field suffered very little damage and made a good growth before being cut on September 11th. If sunflowers are needed with oats in rows fairly thickly the crop can usually be cut with the grain blower.

M. D. of Bertawan

Minutes of Council Meeting held at Sibbald, on Saturday the 4th day of September 1925, at 9 p. m.
Present: Reeve Wilson, Councilors Allwood, Dabell, Mowers and Norris.
Minutes of previous meeting approved on motion of Councilor Allwood.

Adjutant Jones of the Salvation Army interviewed the Council and made an appeal for funds to be used for hospital purposes.

Moved Norris, that the Council donate \$50.00.

Amendment Allwood, that the donation be \$75.00.

Moved Norris, that the Council do not agree as to be amount of annual tax should be levied against voters, and the matter was tabled for the third time in a week.

A telegram was read from the Mayo Hospital, asking that Mr. Burgess be allowed a further advance of \$50.00 to enable him to complete treatment here. The advance was made on motion of Councilor Mowers.

Moved Norris, that suitable from pages be purchased for the cemetery, the same to be numbered consecutively the purchase to be left to the Public Health Committee—Carried.

Moved Allwood, that Kerr and Mays bill for the Onofret burial be paid—Carried.

Moved Norris, that a Constable for Sibbald, be appointed for a period of six months at a salary to be left to a committee consisting of the Reeve, Councilors Allwood and Mowers, to decide. The same committee to make the appointment—Carried.

Moved Norris, that three notices be posted at the main roadway entrances to the town of Sibbald, to warn all drivers of motor vehicles to drive with caution within the limits of the town be not more than ten miles an hour—Carried.

Moved Norris, that the by-law affecting effect to the above regulation be rescinded be 1st and 2nd readings—Carried.

Moved Allwood, that the by-law known as the "Curfew By-law" to regulate the hours during which children under 16 years of age, shall be allowed to be on the streets and lanes of the village, and to provide penalties to be imposed on the parents and guardians of children found on the streets or lanes after 9 p.m. receive its first and second reading.

Notice adjourned till October 2 at 2 p.m.

the leaves on the corn but sunflowers in the same field suffered very little damage and made a good growth before being cut on September 11th. If sunflowers are needed with oats in rows fairly thickly the crop can usually be cut with the grain blower.

Calf Feed

(Experimental Farm Notes)

The calf raised on skim milk is often rather unthrifty due to the lack of fat in the ration. Numerous brands of fat substitutes or meal are on the market to be fed with skim milk to correct the ration of the calf which is denied the natural whole milk ration.

An experiment was conducted at the Scott Experimental Farm in 1925 for 119 day period and repeated in 1926 for a 91 day period in which a home made meal was compared with a commercial product known as Royal Purple Calf Meal. About 12 pounds before feeding the home made meal the desired quantity was steeped in boiling water and added to the milk just before feeding. The home made meal was made up of 2 parts oats, 2 parts corn and 1 part flax; all finely ground, and the quantity fed varied from 1 can to 1 pound per day divided into 2 feeds the quantity depending upon the age of the calf. The commercial meal was fed according to instructions supplied. The cost of the home made meal was \$2.54 per hundred and the cost of the commercial meal was \$5.75 per hundred.

One lot of calves received the home made meal and a similar lot received the commercial meal. Other feeds were the same to each lot consisting of good clean hay and a mixture of 2 parts of whole oats, 3 parts bran and 1 part all cake and dry. Individual weights of the calves were taken frequently during the experiment.

Indian Potentate Pays First Visit to Canada

Exhibits from India at Chateau Frontenac—Quebec, the Ottawa.

Diwan Bahadur Sir T. Vijayraghavaraya, distinguished Indian representative of the Madras Presidency in the All-India Legislative Assembly, and a former Prime Minister of the Cochin State of Southern India, who arrived for the first time in Canada, on the Canadian Pacific liner Montcalm, opened the National Exhibition at Toronto on August 28th.

The Diwan was a picturesque figure on the streets of the various cities he visited, wearing a native turban of crimson and silver. He anticipates crossing the continent on a lecture tour and visiting the Canadian Rockies. Fighting the Laurentians from a vantage point in his hotel in Montreal he exclaimed, "Surely those aren't the Rockies!" During his trip across Canada he is making a study of conditions, for he believes that a complete understanding between India and Canada could only be reached through a knowledge of each other.

At Quebec he was a guest at the Chateau Frontenac and showed great interest in the display of

Indian handicraft and lacquer work which was sent over to Canada by the Indian Government at the Diwan's invitation. He assured E. R. Bruce, director of exhibits for the C.P.R., who met him in Quebec, that he would see that the collection is added to on his return to India. Before the Diwan boarded the Canadian Pacific liner Montcalm for Quebec he was skeptical about the preparation of his favorite Indian dishes.

"I am a vegetarian you know," he said, "and as a matter of fact my Indian curries and rice were better prepared on board the Montcalm than is generally the case on Indian steamers. I was agreeably surprised at this."

The great length of the distinguished visitor's name, has, according to the Diwan, been a stumbling block wherever he went. In England he said they hit upon the helpful expedient of referring to him as "Diwan". In a letter to Canadian officials recently he remarked, "Such a contraction is strictly in accordance with Indian etiquette and will be quite in order."

To Build Mills In Canada For The Manufacture Of Artificial Silk From Pulpmood

When we gaze on a great forest tree, it is easy to imagine it in terms of rich cloth and silken garments. And yet man, not content with silk, cotton, wool, linen and a number of other products of the forest, now employs wood for the manufacture of the latest textiles—artificial silk, or rayon, as it is called by the trade. The backs of all artificial silk is cellulose, and cellulose is the principal constituent of wood.

As long ago as 1859, Count Illiers de Charbonnet produced artificial silk commercially, but it has taken many years of incessant labor to bring the various processes to that stage of perfection which is essential to commercial success. That the industry has now become a great undertaking is due to the fact that the world's production in tons has risen from 7,500 in 1909 to an estimated 100,000 for this year.

The general principle underlying the manufacturing methods is the treatment of the cellulose with chemical reagents to cause the coagulation of the liquid emerging from the nozzles and thus creates the artificial filaments of artificial silk, though the material is not really silk, but a synthetic material, varying with the process, before it finally emerges as that glittering, smooth, and soft material which we now so accustomed, but which would have amazed many a nineteenth century gentleman.

The possibilities for rayon manufacture in Canada, with few pulp wood areas, are enormous. The countries which were first to develop the industry, however, were not those which possessed much raw material, but those which already had the organization, the capital, and the markets for a big textile industry. Thus, shortly before the war, France, already predominant in the manufacture of artificial silk, was followed by Switzerland. Now the big producers and exporters are the United States, Great Britain and the countries of Central Europe that are engaged in the artificial silk trade.

It isn't easy for a fish to keep cool when it is up to its head in the frying pan and the fire.

Win Butter Prices

Saskatchewan Buttermakers Are Successful At Toronto Exhibition

Saskatchewan buttermakers were very successful at both the Canadian National Exhibition at Toronto and the Central Canada Exhibition at Ottawa. At both exhibitions the prizes were awarded on the group system and Saskatchewan buttermakers were near the top of the list in practically every class.

Saskatchewan won 17 prizes, seven of which were firsts, at the Canadian National show, an achievement of which Saskatchewan buttermakers may justly feel proud. Says E. K. Reest, provincial dairy commissioner, in commenting upon the success of the creameries of this province at the big eastern fairs, coming on the heels of the big winlows recently at Vancouver. The showing at Ottawa, where there were nearly so many entries from this province, is also said to be very creditable.

Influenza In North

Taking Heavy Toll Among Native Near Arctic Circle

Influenza is taking a heavy toll among the natives of Canadian and Alaskan territories bordering on the Arctic Ocean, according to Captain Kane Klenberg, medical officer at Coronation Gulf, where there have been thirty-five deaths and many were seriously ill.

Although the epidemic had its first outbreak in the western arctic last winter was not good, owing to the suffering of the natives of Inuit, who expected the first of the epidemic to be over. He plans to dispose of it on the Seattle Fur Exchange.

Strawberries In Saskatchewan

Grown In Commercial Quantities In The Northern District

Strawberry growing in commercial quantities in the northern district is the proud accomplishment of the Vito district in Saskatchewan. The plant has been successfully grown in a sparsely settled district near Coronation Gulf, where there have been thirty-five deaths and many were seriously ill.

Maple Sugar Output

Unreasonable Weather Cuts Down Production This Year

Owing to the unreasonable weather during the tapping season, the production of maple sugar and sugar in Canada this year showed a decrease as compared with the figures for the previous year. The quantity of maple sugar produced in 1926 amounted to 7,157,203 pounds, valued at \$1,250,357, as compared with 10,062,250 pounds, valued at \$1,847,613 in 1925. Maple syrup output totaled 3,746,570 gallons, valued at \$3,757,558, as against 4,672,092 gallons, valued at \$4,440,258 last year. The province of Quebec continues to produce over half of the total Canadian production of maple syrup and sugar.

Coal Production For June

The province of coal in Canadian mines for the month of June was 47 per cent. greater than the average for that month of the five previous years, the monthly report of the Dominion bureau of statistics announced. The figures were 1,587,400 tons in June as against 1,078,700 in May and 1,482,700 in June of 1914. The average of 341,212 tons for the month of June during the five preceding years.

Add Billion To Income

Products Of Farms Of Western Canada Add To National Wealth

In a recent dispatch to the Toronto Globe, W. L. Smith, special correspondent of The Globe, and a former editor of the Farmer's Sun, estimates that approximately \$100,000,000 can be added to Canada's income this year, directly and indirectly, from the products of the farms of Western Canada.

Last year's wheat crop worth \$100,000,000 to the growers, and it put the west in the property column. Mr. Smith believes it is a fair assumption that this year the return will not be less. Western Canada is going into general farming more fully than in the past, and livestock, poultry, dairy products and vegetables will pile up the money returns at every point of handling.

Will Pay Prices

Alberta Department of Agriculture Will Grant Honorarium To Prize Winners

The usual honorarium for grand champion and prize winners in the Alberta exhibitors at the Chicago International Exhibition to be held the first week of next December, will be paid this year by the Alberta department of agriculture. The honorarium for a grand champion is \$250 and for a first prize is \$100. In the International Fair and Grain Show. The exhibitors from Alberta for this show will be collected by the department at the government seed clearing plant, and the department will pay the freight or express on these exhibits from Edmonton to Chicago and return, and will arrange to put the exhibits in place. The special prizes offered by the department are for threshed grain, grass seed, clover seed, haled hay, alfalfa, corn on the cob, etc.

Desirable Trait In "Huskies"

One of Most Important Is Learning to Halt On Command

In Alaska a good team of "huskies" now brings \$200 to \$750, depending upon their strength and the efficiency of their training. One of the most desirable traits in a dog used for team work is his training to halt immediately upon command. Prompt halting is necessary because the great danger of sled travel is the air holes in the ice. To teach them they are often allowed to plunge into ice and hold fast so that the chilly bath may be remembered.

Step

The average amount of "absolute rest" that is gotten during the winter sleep is only 115 minutes according to Prof. H. M. Johnson, of the Mellon Institute at Pittsburgh. The remainder of the time he says there is usually muscular or mental action, even as take place during a dream. Seven and three-quarter hours of sleep is plenty for any normal man, he says. The scientist declares—New York Times.

Planning For World's Poultry Congress

Many Nations Sending Delegates To Ottawa Next Summer

Definite foreign countries have already accepted invitations to send delegates to the world's poultry congress, to be held in Ottawa next summer. It was stated at a meeting of the congress preparatory committee at the Canadian National Exhibition. Reports were received from committee members on different features of the congress and all reported progress in their work of arranging for the largest gathering of poultry fanciers that has ever taken place in the Dominion.

The United States has agreed to send 1,000 automobiles to take part in the tour which is being arranged from United States border points to Ottawa and the American Poultry Association will stage one of the largest foreign exhibits to be presented at the congress.

Prefer Canadian Wheat

Purchasing Agent From Cuba Buys Canadian Goods

Canadian hard spring wheat is preferred to all other varieties in Cuba according to J. K. Gonzales, purchasing agent for the Government of Cuba, who was recently in Montreal buying Canadian goods for his country. The annual exports of Canada to Cuba in value nearly \$3,000,000. When in Montreal, Mr. Gonzales arranged for the purchase of \$275,000 worth of potatoes for his country. He will also buy quantities of flour, hay, oats and other products.

It will be only a few years before the annual Cuban consumption of Canadian grain will assume much larger proportions, said Mr. Gonzales. A product was on foot to create large herds of cattle, and when these were finished, the demand for Canadian wheat would be more than quadrupled.

Knew Them All

The Girl—Hello, Solie speaking; who is this? Voice on the Telephone—Ladies, sweethearts. Who? I can't understand you. Lady—L, for Ludwig, U for Ulrich, I for Irlitz, W for Wilhelm, I for Irlitz, G for George.

Beer Consumption Low In Germany

Germany, once known as a nation of beer and coffee drinkers, is turning to cocoa and chocolate. The remainder of the time he says there is usually muscular or mental action, even as take place during a dream. Seven and three-quarter hours of sleep is plenty for any normal man, he says. The scientist declares—New York Times.

Farming Is The Fundamental Source Of Canada's Wealth And Basis Of Our Prosperity

A Little Known Industry

Mining For Timber Has Become Important Business

Digging in the earth for minerals is no new thing, but it is not generally known that mining for timber has been carried on as an important and lucrative business. In a wide swamp near Chicago quantities of white oak logs are being recovered, the remains of a great forest that was submerged seven or eight thousand years ago. Although the outer layers of wood have decayed, some chemical agent in the soil has made the remainder firm and durable and given it a mottled color, for which it is much prized. Gold prospectors on the Chaudiere Plains in Australia recently discovered in the bed of a river long abandoned up, a valuable deposit of timber known as the she-oak. Many of the logs unearthed had the appearance of having been cut and trimmed by human hands. This wood is also noted for its toughness, and is employed in the manufacture of ornaments and toilet articles. In the peat bogs in Ireland deposits of bog oak are frequently encountered. This substance is jet black and exceptionally hard and provides a profitable industry for the inhabitants, who fashion it into ornaments, pipes, crosses, and so on.

Should Eat Little Meat

Drink More Milk and Add Eight Years to Life

By drinking more milk and eating less meat one can add eight years to the "part of his life worth most to himself and to the world." If C. Gordon, professor of chemistry at the Columbia university, stated in a recent address.

Heavy Yield In Alberta

Sheepkeeping Business Has Yielded Good Results

The sheepkeeping business of Alberta which is centered mainly in the Irrigation districts, has yielded good results. In the Irrigation districts, the sheepkeeping business has yielded good results. In the Irrigation districts, the sheepkeeping business has yielded good results.

To Study Conditions

British Board of Trade Delegates to See Canada

Sir William Macdonald, chairman of the board of trade delegation which is to make a study of industrial conditions on this continent, has arrived at Quebec from Liverpool accompanied by F. W. Lofort, assistant secretary of labor, I. H. Mitchell, secretary of the ministry of labor, and C. E. Drouin, who will act as secretary of the delegation. They will be several weeks on this continent, visiting numerous centers in Canada and the United States.

May Exports Vary

One of the most valuable Canadian export products is hay, according to the natural resources intelligence service of the department of the interior. Exports of hay vary roughly between 50,000 and 500,000 tons annually, chiefly to the United States, Britain, France, Newfoundland and the West Indies. In the latter island Canadian hay has to meet competition from sugar cane leaves which is used as a fodder and sold at very low prices.

Wrap Papers In Silk

To "carry your package home" in Japan is the matter of course thing to do. If it is a "lady of high degree" who will produce from the capacious depths of her kimono sleeve a roll of white, or colored Japanese paper that may have come direct from the Seven Thousand Isles of Japan or from the mountainous regions of the island and common to a degree to carry a bare package through the streets.

Special beds, tables and chairs are now provided for tall men and women at a London hotel.

Enough Apples For Everyone

One Barrel of Apples For Every Person

In relation to population Canada and the United States will each produce this year one barrel of apples for about every three persons in the population. The commercial apple crop of Canada is valued at 2,500,000 barrels. The British population is 3,000,000 in round figures. In the United States the apple crop is estimated at \$6,000,000. In Ontario, Quebec, Nova Scotia and New Brunswick, the principal fruit growing provinces, the apple crop is slightly more than last year, but is 20 per cent. more in British Columbia than a year ago. The production in 1925 of the United States was valued at 1,200,000 barrels. A considerable part of the Canadian apple crop is exported to other countries where it finds a ready market. The fruit is sold principally through co-operative organizations of fruit farmers.

Where Women Are In Demand

Are Outnumbered By Men In Australia, New Zealand and South Africa

In England there are 1,096 females to every 1,000 males, but the proportion of women in Australia is only 516 per 1,000 men, in New Zealand 507, in South Africa 542, and in Canada now as 540—that is to say, while 96 per 1,000 women in England must remain spinsters the dominions have large numbers of marriageable women doomed to bachelorhood. In Australia the ill-fated bachelors, according to the latest figures, number about 90,000. In New Zealand 27,000, in South Africa 41,000 (these are whites only), and in Canada 370,000—a total of 613,000. It is expected that even other many wives unless the dominions or not marry at all.

Too Many Books

Far too many books are published and the majority of them are of the most ephemeral interest and are forgotten within a few months of their appearance. The world would be just as well off if nine-tenths of the books that are printed never saw the light of day. And yet once a book attains the dignity of print it achieves a sort of immortality, no matter how poor it is—London Mail.

A Libelous Word

A Pennsylvanian court has decided that when one calls another "parasitic" he libels him. It seems that the word means "strange" or "unpleasant" and it is considered to be a libel and common to a degree to carry a bare package through the streets.

Yonah's Communion

The first power looms in the world for making carpets were set up at Lowell, Mass., in 1829.

This magnificent mounted head of a Rocky Mountain sheep was presented recently to L. L. Colwell, C. P. James, D.S.O., Commissioner the Argill and Sutherland Highlanders at the sale of Wigan, by Colonel Sir George McLaren Brown, K.C.B., European general manager of the Canadian Pacific Railway. The head was sent forward from itself by the 1st Battalion of the Highlanders, 19th Battalion C.E.F., in commemoration of the fact that they have become affiliated with the Argill and Sutherland Highlanders. Sir George is an honorary member of the Officers Mess of the Calgary Highlanders.

The trophy has been dispatched to Stirling Castle depot and has been hung in the Officers Mess there.

WORLD HAPPENINGS
BRIEFLY TOLD

The Federated Malay States have given \$10,000 towards the cost of the naval base at Singapore.

The up-to-date successor of the horse thief has been discovered with a report made by a New York aviator that his plane was stolen while he was at dinner.

The British Government have appropriated \$10,000 for the connection with the British Industries Fair in London and Birmingham from February 21 to March 4 next.

Mrs. Clara Von Kozlowsky, Gyor, Rumania, celebrated her 120th birthday by taking her great, great-grandchild for his first walk, and taking etc. etc.

Germany and Sweden have agreed to abolish passport laws beginning Oct. 1. Similar abolitions between Germany and Luxembourg and Portugal became effective Sept. 1.

A cable from Paris announces the appointment of Dr. Paul Garçon, of Quebec, to the post of foreign assistant in the service of Dr. A. Gosset, one of the most prominent surgeons in France.

"Our Lady of the Air" has been consecrated as the patron saint of the aviators of Portugal. It is a beautiful image of the Virgin Mary, with arms uplifted toward Heaven, and it stands in a tiny chapel erected for it in the Citra aviação camp.

Special dispatches say two men, Samuel McKean and Joaquin Silva, have been summarily court-martialed and executed at Tiquinlin, in the state of Michoacan, on charges of sedition and propaganda in connection with the religious question.

The Soviet has appointed a special commission to formulate laws and regulations dealing with opium, for the purpose of investing the state with complete control of the manufacture, import and distribution of it and its derivatives.

The Queen of Rumania will be one of the least prominent passengers when she sails to the United States, members of her suite declared, denying reports circulated that she had refused to accept passage as a woman that would not give her the royal title or cabin.

In the presence of air attaches of the great powers at the annual air show, the new hydroplane with five engines, weighing 2,110 horsepower, was flown in France. With a load of 11,000 pounds, the plane attained a speed of 90 miles an hour. It takes to the air from the water in 50 seconds.

Britain Buys From Canada

Increase in Exports to United Kingdom as Shown

An increase of \$107,554,845 in the value of Canadian exports to Great Britain during the twelve months ended July 31, last, as compared with the preceding twelve months' period, is shown in the trade summaries issued through the Dominion Bureau of Statistics. Exports of Canadian produce to Great Britain during the twelve months that ended at the date reached a total valuation of \$51,260,182, while for the corresponding period of 1925 they amounted to \$40,450,907.

Imports from the United Kingdom during the twelve months under review were valued at \$145,240,512 as against \$154,457,625 in the twelve months that ended July 31, 1925.

Nothing Impossible

Sam was an old southern darter whose inability would never permit him to acknowledge a thing could not be done, even though he was urged at a loss as to procedure. He was called by a tenant in the flat where he was just to examine a leaky pipe. "Now, I could find that leak," he said, scratching a bewildered head, then added in a burst of inspiration, "if I could just locate it!"—Indiana News.

Honey Industry Growing

Considerable progress has been made in bee culture in the western provinces during recent years. One beekeeper in Alberta reported more honey during 1925 than was produced by the entire province in 1924. In Manitoba, the honey crop tripled in three years, and in Saskatchewan it reported crop of 1924 was over fifty times as large as that of 1915.

Sending Reindeer To Seattle

For Christmas, reindeer in the United States, 225 live reindeer were loaded on the A.S. W. M. Tupper, at Crow's Nest. The reindeer will be shipped to the Kuskokwim River of Alaska. More than 1,000 reindeer carcasses and canned, smoked and pickled reindeer will be taken to Seattle by the Tupper.

W. N. U. 1647

"Ideal Fashions"

The Cape Frook An Established Vogue

The Cape has become a part of every phase of the mode, and is now more smart than when used on the street frock, as pictured in this model of navy, triangle with wide, draped skirt. The Cape is separate, but as flattering as any other waist to take it off. It has a long collar of its own to be tied at the neck, or the outer corner at the back and one at the front. The frock underneath is straight, with a tailored collar ending in long revers, and a set-in panel. The skirt is set in at the armpole, and a wide belt is crushed into a big buckle. No. 1299 is for the little and small woman, and is in sizes 16, 18 and 20 years. Also 15 years (the bust) requires 31 yards 54-inch plain material, and 1 1/4 yards 54-inch skirt. Price, 20 cents.

The secret of distinctive dress in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the Boston Village in our new Fashion Book to be a perfect and simple guide to the making of the mode of the moment. Price of the book, 20 cents. The very

Radio Stations Protest

Says Canadian Wave Lengths Pre-empted By U. S. Stations

Radio stations in the United States are protesting Canadian wave lengths and thereby preventing the opening of more Canadian stations. This charge was made at a meeting of the National Association of Broadcasters held in New York by A. R. McKean, radio director of the Canadian National Railways.

World's Largest Cable Landed

The world's largest cable, 2,400 nautical miles in length, capable of handling 2,500 words a minute between the United States and England, has been landed at New York. The cable was brought ashore by the largest cable ship in the world, the Columbia, for the Western Union Telegraph and Cable Company, completing a three months' task.

Too Late

Sophia, aged eight, to grandpa: "Grandpa (sighs): 'Little girls should listen and not talk.'"

At the end of the dinner Grandpa, in a gentle mood, calls the child and asks: "What was it you wanted, dear?"

"Too late, Grandpa: there was a fly on the salad, and you ate it!"

Big Steam Plant

Announcement is made that the East Kootenay Power Company will spend \$1,000,000 in the construction of a steam plant on the Alberta side of the Alberta-British Columbia boundary at Crow's Nest. The work will be started this fall. The plant will utilize coal from the adjacent mines in the Crow's Nest Pass.

The only thing that some people learn from experience is what fools they have been.

Take Drastic Measures

United States Mail Clerks Go Orders To Shut To Kill

"Shut to kill" bill—The bill has been passed to 22,000 railway mail clerks as a drastic means of protecting the precious postal treasure from handouts the United States post office department has announced.

If this method of defensive warfare against the underworld proves adequate, post office department authorities indicated the United States Marines might be called in again to guard the mails, as they did in 1921.

The command not only applies to railway mail clerks, but to all postal employees, and is intended as a warning to henchmen who make a business of robbing mail trains. The order instructs all employees to defend mail property even at the expense of their own lives.

The recent Chicago hold-up, when \$125,000 in currency was stolen, is said to have inspired the order. Postmaster-General Hunt issued the command after a sudden conference with postal experts.

Holland Made Tulip Popular

Government Had to Step Back For Bulb Growing

The tulip, called by the Turks the flower of war, was brought to Holland from Vienna in the late years of the reign of Queen Elizabeth. It is a native, there is no doubt that the Dutch contained in large measure to its popularity. During the tulip mania of the 17th century bulbs in Holland were worth their weight in gold. In 1635, 125, 120 specimens were sold for 50,000 florins. Finally the government decided to intervene to stop the boom, for bulb growing was beginning to hamper agriculture.

Goos Back To Potsdam

German Anti-Republicans' Glad To Have Former Crown Prince

Former Crown Prince Friedrich Wilhelm has arrived at Potsdam, the last residence of his ancestor, Frederick the Great, and now a fortress of the German anti-Republicans who are delighted to have a Hohenzollern there again.

The former crown prince, who hitherto has been living the life of a country squire in his castle at Orlow, which may be taken away from him as a result of the government's measures in connection with the former crown prince's property, says he intends to live a "quiet, secluded life."

More Appropriate

"In your sermon you spoke of a lady as a new wave on the ocean of life," remarked Mr. Yonchubander.

"Quite so," replied the clergyman. "A poetical figure of speech."

"That's you think," interrupted the harassed member of his flock, "that a fresh squall would hit the mark better?"

When a single girl asks a single man if he smokes, the plot begins to thicken.

An Expert at the Game

Early Gossip: Notice any improvement since last year?

Caddie: Had your clubs shined up, haven't you?

Teror As a Check

As long as there are persons who hold that a murder trial is a mere battle of wits, instead of a stern process of justice, it must be expected that sentences of surprising leniency in proportion to the crime will sometimes be imposed. Not until murder becomes so prevalent that people are thoroughly frightened, will they regard gangsters as dangerous public enemies, who must be put where they can do no more harm. This point of terror appears to be rapidly approaching.—New York Herald Tribune.

Cement Production Shows Increase

A statement issued by the Dominion Bureau of Statistics at Ottawa states that the value of cement products made in Canada during 1925 amounted to \$2,929,235, an increase of 61 per cent, over the \$1,757,817 produced in the previous year and 31 per cent, over the \$1,565,528 reported for 1923.

Plants Making Cement Products such as bricks, building blocks, pipe, asphalt, etc., are being produced in large quantities. The plants will utilize coal from the adjacent mines in the Crow's Nest Pass.

"Dilly Dilly, famous British p.p. and his wife, who have come to Canada to settle, home here. They were photographed on board the Canada liner Albatross just before she docked at Montreal last Monday. Mr. Beth has been pro at the Eltham Golf Club, Eltham, Kent, for nearly 55 years, and is an expert in every phase of the game.

A Little Miss and a Big Man

Golden Text: Let us run with patience the race that is set before us, looking unto Jesus, the author and finisher of our faith. Hebrews 12:1.

Devotional Reading: Psalm 105:14.

A Review By Means of Allusions

As you read each allusion, find out how many points you can find. One may explain it. Then, rapidly and with few questions about the lesson, which the allusion recalls.

"God lets us thirst by Herod's rock, And hunger the wilderness; Yet in our thirst, faintest knock, He waits to bless."

Angels of Life and Death alike are his. Without him leave they pass no threshold—Over—Longfellow.

Look you, the sins of the fathers are to be laid upon the children.—Ezekiel.

Do not wait with words unspoken. While life's daily bread is broken, Gentle speech is oft like manna from the skies.

Margaret E. Sangster.

For as the Lord's Saviour means not only that the suffering souls pass over us and leave us in sorrow, but that the glorious, living God sees our spiritual suffering.

Thirty-five centuries have passed since the first recorded persecution of the Jewish and only centuries, the gutters in Russian villages were running with their blood, yet civilization has still to learn the lesson that the Jew can be destroyed only by himself.—Lawrence Langer.

Manitoba Grown Hemp

Numerous Articles Now Manufactured From Local Products

A strange discovery of the products of the hemp plant, which is now being raised in Manitoba, is the fact that the plant is on display in the Canadian exhibition on, Main Street.

The exhibit, put up by the R. C. Fibre Mills, consists of green hemp straw, fibre glass grown at the M.A.C. Hemp and hemp fibre straw.

Samples also of dew and water-proof green and green glass and spooling tow are on show. The different types of cord, running from rope made from hemp straw, through various clothes lines, garden lines, binder twines and smaller cords, as well as roofing felt, oiled and oil felt, are a few of the products which are exhibited.—Press Press.

English Nurse Is Plucky

Nearest Neighbor In Central Africa Five Days' Walk Disent

To the lower valley in Central Africa an attractive young lady has been sent to home at Port St. John, taking with her a stick of new "Moorland" serum, which is believed to effect a cure of the dread disease.

She is a medical lady, and her headquarters are at Zomba, on Lake Nyasa. She is the only nurse in a distance of 60 miles, and her nearest neighbor is five days' walk off.

"Leopards and lions walk around the house at night," she states, "but I am not afraid of them, particularly when they are hungry to deal with them."

Just before she left to visit England eight men-eating lions killed 26 villagers, but they were all eventually trapped.

Chicken Shooting Banned

Order-in-Council Is Passed by Manitoba Government

Prairie chicken throughout Manitoba will enjoy a further bonus of immunity from the law, as a result of an order-in-council passed recently by the provincial government. The reason has been declared closed in respect of the prairie chicken, particularly as it grows throughout the province, making the second year in succession this immunity has been granted.

Shooting, and indeed any other governmental order that the results will justify the action. The open season for duck shooting is extended until Nov. 20. The quota per gun is 20 a day from Sept. 15 until Oct. 1, and thereafter 40 a day until the open season closes.—Press Press.

Had Best of Argument

A story is told concerning Father Bernard Vaughan when he was touring in America. A boastful American at St. Louis said to him one day, "Look at our Mississippi and Hudson Rivers. Why, in comparison with them your Mersey and Severn and Thames are sleepy, sickly streams."

He replied, "Father Vaughan, I think yours are just as sickly as ours."

"How do you make that out?" inquired the American. "Well, they are all cold, aren't they?" replied Father Vaughan.

Rations For Elephants

Tame elephants, many of which are beasts of burden in the Orient, eat an enormous quantity of food. A full grown elephant, for instance, will eat on an average a thousand pounds of green fodder and not less than 25 pounds of unshredded rice daily.

The problem of properly feeding a tame elephant is a big one.

Suit Applies To Some

Many a person who is a small eater has feelingly been described as having "a bird's appetite." How inaccurate this designation is, may be gleaned when one learns that some birds eat several times their own weight each day.

Opportunity knocks but once, but your tried and true friends knock all the time.

Balance the home budget

A NATION which balances its budget and shows a surplus is usually prosperous. It is so with the home. Men who start each month with debts paid and an increased saving in the bank are well on the high road to success.

Balancing the Home Budget is merely a question of saving—of regularly depositing a part of your earnings in a good bank.

The Bank of Toronto is always glad to co-operate in fostering the saving habit. It offers its splendid banking service and facilities to all who wish to enjoy the independence which consistent saving alone will give.

Consult the nearest Bank of Toronto manager.

For Economical Transportation

Low Price-High Quality

CHEVROLET looks like an expensive car. You will find the beautiful Fisher-built, closed bodies on Chevrolet—it is the lowest-priced car in the world having Fisher bodies. You will see appealing Duco finish in colors on Chevrolet. You will discover luxurious upholstery—hand-sewn nickel-silver interior fittings—cay rugs on the floor—silk blinds on the windows—down light in the roof—a robe rack and a foot rest—all in the Chevrolet sedan.

Chevrolet drives like an expensive car. The extra powerful Chevrolet engine performs with amazing smoothness. The standard gear-shift works with ease and quietness. The drive-shaft clutches engage smoothly, almost without

effort. Extra-large, self-adjusting brakes make motoring safe and secure. The knowledge steering wheel—with centrally mounted spark and throttle levers and horn button—handles with ease and smoothness and small-car facility.

The Smoothest Chevrolet in Chevrolet history is selling at the Lowest Price for which Chevrolet has ever been sold in Canada.

About Town and Country

John F. Miller, eye sight specialist of 401 Underwood Block, Calgary, will be at hotel in Oyen on Thursday, September 30. Tell your neighbours.

The Oyen General Hospital recently installed and now uses the latest model sterilizer. This new piece of equipment has been tried and found to be in every way satisfactory. Plinched in highly polished nickel and mounted on white enameled tubular steel stand, the new sterilizer is in keeping with other up-to-date equipment purchased. The new sterilizer is operated under high steam pressure, is equipped with all the latest safety devices, and is capable of handling the requirements of a sixty-bed hospital.

Mr. Cooper, a Red Cross representative, was in town last Thursday doing preliminary organization work in connection with the district fall drive for Red Cross Funds.

A whist drive and old time dance will be held under the auspices of the Order of Eastern Star, in the Masonic Hall, Oyen, Thursday, September 30, commencing at 8 p.m. Everybody welcome.

The first chapter of a new serial will be shown at Oyen Theatre next Friday-Saturday. The second chapter will be shown next Monday-Tuesday, followed by one chapter every Monday and Tuesday until completed. You'll like "Wild West."

A bean supper and sale of home cooking will be held next Saturday in the Masonic Building, Oyen, ground floor. Afternoon tea served. Part of proceeds to go to Sunday School Christmas tree fund.

The World's baseball series will open Saturday, October 2, in the city of the American League pennant winning club. The second game will be played on the same ground. The 3rd, 4th and 5th games, will be played in the city of the pennant winning National League club. In the event of 6th or 7th games being necessary they will be played in the American League city.

Otto H. Kahn, chairman of the board of directors of the Metropolitan Opera Company, accompanied by a party of internationally known financiers of New York, visited the National Exhibition at Toronto recently. Mr. Kahn, who is perhaps the leading art and music patron of the United States, addressed a luncheon of the directors of the Exhibition on September 2nd, the day of the Exhibition, which was set aside as "Music Day."

Rev. C. Lynett returned to Oyen last Saturday after spending a vacation in the east.

Mrs. J. M. Hanbridge and two children of Kerrobert, Sask., arrived in Oyen yesterday, and are the guests of Dr. and Mrs. W. D. McPhail.

Chas. P. Snyder was a business visitor in Calgary yesterday.

On Sunday the district was favored with a real sample of the brand of weather which has been "Sunny Alberta". The hopes of all that a change had come and a few weeks of similar weather would follow, were rudely dashed, however, when a high wind commenced to blow early on Monday evening, followed by a flurry of snow. This was followed by another heavier snowfall last night and this morning, which means another delay to threshing operations. A drop in temperature is now looked for.

Canada is to issue a series of memorial stamps this year, honoring five statesmen, Sir Wilfrid Laurier, Sir John A. Macdonald, Hon. E. D'Arby McLean, Hon. L. H. Fontaine and Hon. Robert Baldwin.

Say you saw it in the News

In Lighter Vein

A man went into I. Cohen's bookstore and asked: "Have you got a copy of 'Who's Who and What's What' by Jerome?" Cohen replied: "No, we have 'It'. But we got 'Who's He and What's He Got' by Bradstreet."

God created women beautiful and foolish—beautiful so the men would love them; foolish so they would love the men.

Calf Feed

(Continued from page 1.)

The average total gain per head for the 2 tests was 179 pounds for the lot getting the commercial meal and 166 for the other lot. The total cost of all feeds per hundred pounds gain was \$4.91 for the commercial feed lot and \$4.61 for the lot getting the home made meal. These results indicate the home made meal to be more economical and to be capable of producing practically the same gain as the commercial meal.

Further particulars regarding calf feeding experiments may be obtained upon request to Dominion Experiment Farm, Scott, Sask.

Recreation that develops Skill

BILLIARDS promotes sportsmanship and skill. If you see a man with a keen eye and an optimistic outlook on life, it's a safe bet he's just played a game of billiards on our modern Brunswick equipment.

LEGAL NOTICE

FARM FOR SALE

The S.W. 1/4 and the N. 1/2 of Section 12, Township 28, Range 4, West of the 4th Meridian, Alberta, containing 480 acres more or less, subject to taxes from the 31st of December, 1925. Sealed tenders with marked cheques for 5 per cent thereof, addressed to L. F. Clary, Esq., K.C., Master in Chambers, Court House, Calgary, marked S-1 2020, will be received up to Monday, the 11th day of October, 1920, at 11 o'clock a.m. for the purchase of the above property.

The farm is 2 1/2 miles from Oyen, at which place are the nearest school, railway station, and post office. 250 acres under cultivation. Soil is chocolate loam, clay subsoil. Buildings consist of house, granary, stable, pump house and chicken house. Property all fenced except 1 mile in fair repair. Water from 2 wells.

Sale is subject to the rights of the present tenant to harvest this year's crop, and tenant must vacate the property on one month's notice.

No tenders for an amount less than \$5,000.00 will be considered. Terms: Cash on 10 per cent on acceptance of tender, including deposit, 10 per cent in 90 days without interest, and the balance in 12 and 18 months with interest at 8 per cent per annum.

No tender necessarily accepted. Certified cheque for 5 per cent of purchase price must accompany tender. Standing conditions of sale to apply except as to terms of payment.

Further particulars may be obtained from Messrs. Moffet, Mackay and Co., the solicitors for the Plaintiff, 305 Green Exchange Building, Calgary, Alberta.

Dated at the City of Calgary, in the Province of Alberta, this 5th day of July, A.D. 1920.

Here and There

It is understood that purchases in Canada of 5,000 railway cars may result from the visit of the engineering expert, Mr. Vandergucht, and the Transport Commissioner's representative, Mr. Baronsky, who have been delegated by the Soviet Republic to investigate the possibility of securing this number in Canada. They have also been instructed to make a study of the organization of the Canadian railway shops and the repair methods in general.

Three wolf cubs were caught recently near Lake Douville in Northern Ontario by Arthur Beauvais, well-known driver of the Chateau Frontenac dog team at Quebec, and will be trained by Beauvais for the harness. He is confident that by mingling the wolves with husky puppies for several months they will lose some of their wolfish nature and make an attractive addition to the Chateau team. Beauvais states that, while wolves have endurance, they have not the "heart" of a husky dog.

Two world's swimming records were established at the Crystal Gardens swimming pool at Victoria recently, when Ethel McGarry, of New York, swam 400 yards in 12 minutes and 41 seconds, or nine seconds better than the previous woman's record for this event; and when Agnes Gerahy, also of New York, clipped five and two-fifths seconds off the previous record for 200 yards, by completing the distance in three minutes and 12 and three-fifths seconds.
